THE NEXT GENERATION OF HEATING CONTROL

HELPING YOU SAVE MONEY AND ENERGY...

Heat Genius allows you to reduce your household energy consumption by only heating the rooms you are using. Through managing the heating of each individual room in the house and learning the best schedule automatically, it helps you to save money and energy with no loss of comfort.

HEATING - 66%
Of the average household energy bill

WHAT PEOPLE SAY ABOUT US...

"With £380 saved/year on average due to Heat Genius installation and 20% more efficiency, the facts speak for themselves. I would totally recommend Heat Genius."
Joshua, Norfolk

"The system gets A++ from me - I would absolutely recommend this company and this system - absolutely brilliant!"
Richard, Cambridge

Room Sensor

An occupancy sensor helps the Heat Genius system learn your daily routine.

Genius Hub

Connects your heating to the internet. It plugs into your broadband router and communicates wirelessly to the Boiler Controller, Thermostat, Wireless Radiator Valves and Room Sensors, allowing you to control Heat Genius from any Internet device.

Boiler Controller

Replaces the existing thermostat to allow the Genius Hub to switch the boiler on and off wirelessly.

Hot Water

Optional extra: if you have a hot water tank, you can schedule it from the Heat Genius app.

Wireless Radiator Valve

Allows you to heat individual rooms exactly when you need them.

Thermostat

To be placed in a cool room in the house to provide hands on control.

BY ONLY HEATING THE ROOMS YOU USE

With the Heat Genius system you can control the temperature in every room of your house by using our Wireless Radiator Valves, meaning that you will no longer waste energy heating rooms that are not in use. By installing these valves you can set different temperatures for different times of the day for each room, so you can always be comfortable whilst saving money. The beauty of the Heat Genius system is that you don't even need to be at home to turn the heating on; using the app you can control your heating by using any wireless device such as a phone, tablet or computer.

EASY TO INSTALL

Installations take about two hours and can be done by any electrically competent person. Heat Genius works with almost any 'wet' system, including heat pumps, gas, oil or biomass boiler. Most components of the system are wireless, allowing for an easy installation.

WHAT PEOPLE SAY ABOUT US...

"I came across the Heat Genius system, which can control individual radiators using wireless valves. Buying it is one of the best investments I've made."

Johannes, Kilbirnie

"Heat Genius is great because it lets me easily control the heating throughout my house remotely. The best thing is that it automatically learns about my behaviour!"

Anna, Chelmsford

CONTROL YOUR HEATING ON THE GO

REMOTE CONTROL

Wherever you have Internet access you can check your heating as the Heat Genius system can be controlled from a computer, tablet or smartphone using our free app.

HEATING HISTORY

The Heat Genius system records your heating history, allowing you to see all the changes in the heating usage and potential energy savings.

LINKED ROOMS

You can easily link rooms so that they come on at the same time, making them quicker to schedule.

HOT WATER

If you have a hot water tank, use our Heat Genius Hot Water Controller to schedule your hot water when you need it.

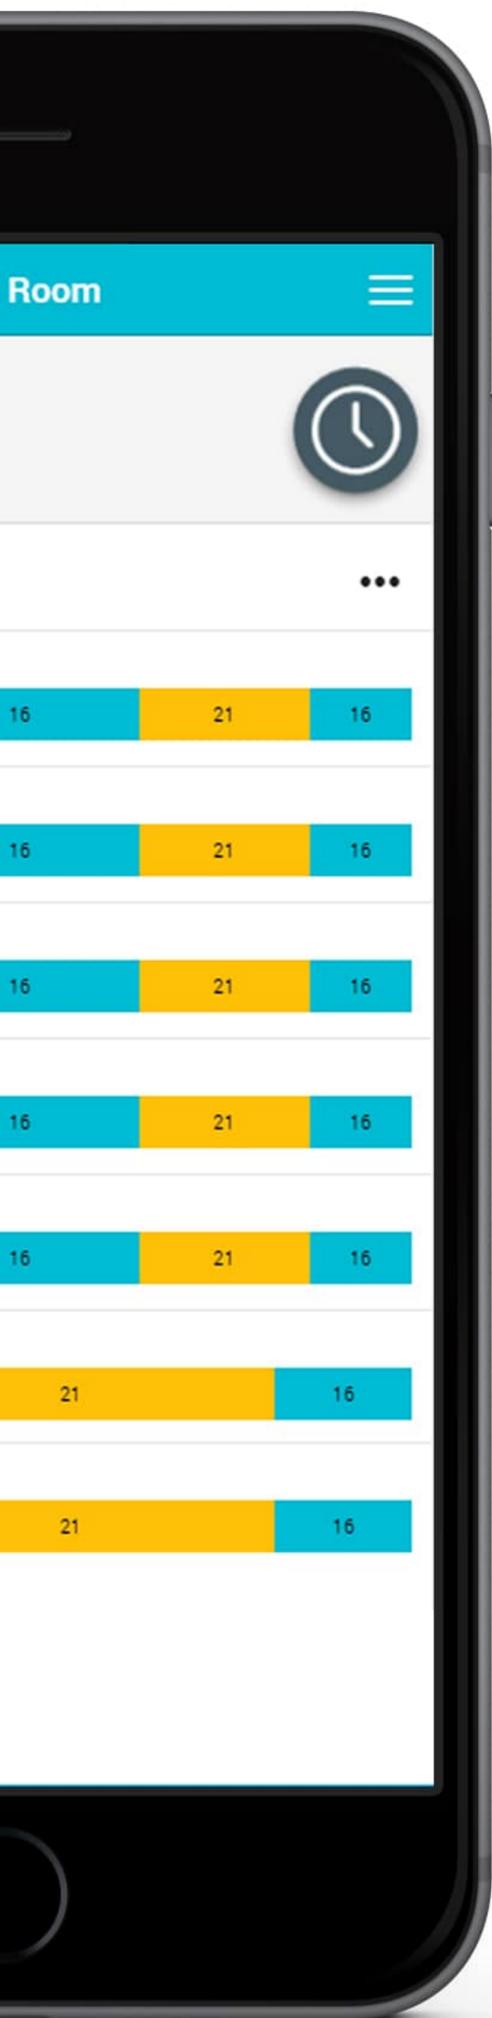

WEATHER COMPENSATION

The Heat Genius system takes into account the weather outside, warming your rooms up earlier when it's really cold, to make sure the room is comfortable for when you want to use it.

EASY TO SETUP & ADJUST

It takes minutes to set up for the first time and only seconds to adjust the schedule or the temperature. To make it even easier, you can copy your settings between days and rooms.
