

Description

The Plug Locking Cover is an addition to the Genius Smart Plug to stop it being unplugged by users of the property. These are often useful in hotels, offices, and student accommodation.

Plug Locking Cover is designed to be screwed onto a Single Gang socket, using the standard M3.5 terminal screws already used by the Single Gang socket. Alternatively, this can be fitted to a Double Gang socket using the adhesive pads (provided).

For more information on compatible sockets, see www.geniushub.co.uk/plug-sockets.

Application

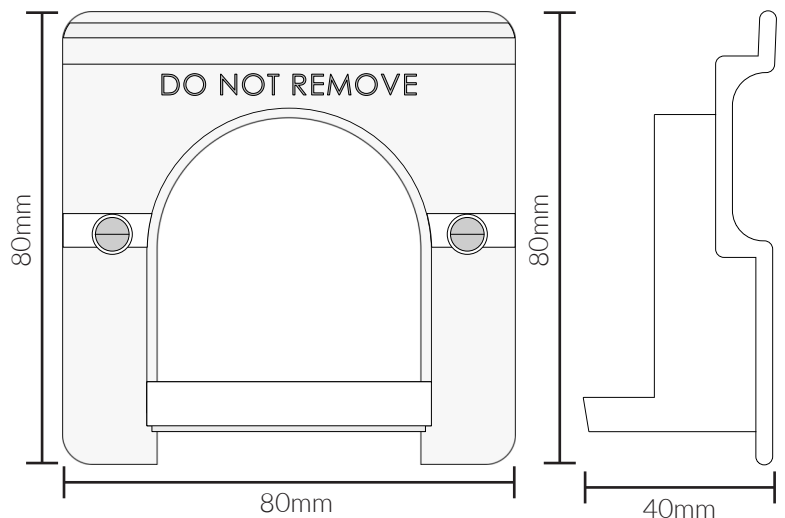

- Tamper proofs Smart Plug

Works With

- Smart Plug (Single Band – PH-PLG-D)
- Smart Plug (Dual Band – PH-PLG-E)

Plug Locking Cover

SKU: GE-PLC-A
